

# NFT DEVELOPMENTS

Whitepaper

**Licences and approvals are not assured in all jurisdictions:**

NFT Developments LTD (“NFTDevelopments.com”) intends to operate in full compliance with applicable regulation and laws and use its best efforts to acquire the necessary licences and authorizations. Regulatory licences and/or approvals are likely to be obligatory in several significant jurisdictions in which relevant activities may take place. This implies that the development and roll-out of all the initiatives, Proposals described in this whitepaper are not guaranteed. It is not possible to guarantee, and no person makes any representations, warranties, or assurances, that any such licences or approvals will be obtained within a certain timeframe or at all. As such, the initiatives described in this whitepaper may not be available in certain jurisdictions, or at all. This could require restructuring of these initiatives and/or its unavailability in all or certain respects. In addition, the development of any initiatives is intended to be implemented in stages. During certain stages of development, the project may rely on relationships with certain licensed third-party entities. If these entities are no longer properly licensed in the relevant jurisdiction, this will impact the ability of NFTDevelopments.com to rely on the services of that party.

**No advice:**

This whitepaper does not represent any financial advice, investment advice, trading advice or recommendation by NFTDevelopments LTD (“NFTDevelopments.com”), its affiliates, or its respective officers, managers, directors, agents, advisors, employees, or consultants on the merits of purchasing NFTDevelopments tokens (“NFTD tokens”) nor should it be relied upon in connection with any other contract or purchasing decision.

**No representations:**

No representations or warranties have been made to the recipient of this whitepaper or its advisers as to the accuracy or completeness of the information, statements, opinions or matters (express or implied) arising out of, contained in, or derived from this whitepaper or any omission from this document or of any other written or oral information or opinions provided now or in the future to any interested party or their advisers.

The NFTD tokens, as envisaged in this whitepaper, are under development and are being constantly updated, including but not limited to key governance and technical features. When the NFTD tokens are completed, they may differ significantly from the description set out in this whitepaper. No representation or warranty is given as to the achievement, rationality, or reasonableness of any plans, future projections or prospects and nothing in this document is or should be relied upon as a promise or representation as to the future. To the fullest extent possible, all liability for any loss or damage of whatsoever kind (whether foreseeable or not and whether NFTDevelopments.com has been advised of the possibility of such loss or damage) which may arise from any person acting on any information and opinions contained in this

whitepaper or any information which is made available in connection with any further enquiries, notwithstanding any negligence, default, or lack of care, is disclaimed.

**Third party data:**

This whitepaper contains data and references acquired from third party sources. Whilst the organization believes that the data are accurate and reliable, they have not been subject to independent audit, verification, or analysis by any professional legal, accounting, engineering, or financial advisors. There is no assurance as to the accuracy, reliability, dependability, soundness, or completeness of the data within this whitepaper.

**Not a sale of security:**

This whitepaper does not constitute a prospectus or financial service offering document and is not an offer to sell or solicitation of an offer to buy any investment products, regulated products, security, or financial instruments in any jurisdiction. NFTD tokens are not being structured or sold as securities in NFTD tokens. Owners of NFTD tokens are not entitled to any rights in NFTD tokens or any of its affiliates, including any equity, shares, units, royalties to capital, profit, returns or income in NFTDDevelopments LTD or any other company or intellectual property associated with NFTDDevelopments LTD.

**Third party references:**

References in this whitepaper to specific companies, networks and/or potential use cases are for illustrative purposes only. The use of any company and/or platform names and trademarks does not imply any affiliation with, or recommendation or endorsement of/by, any of those parties. All references to 'dollars', USD or '\$' are references to the United States Dollars unless otherwise stated.

**Translations:**

This whitepaper and related materials are issued in English. Any translation is for reference purposes only and is not certified by any person. No assurance can be made as to the accuracy and completeness of any translations. If there is any inconsistency between a translation and the English version of this whitepaper, the English version shall prevail.

**Restricted transmission:**

This whitepaper must not be taken or transmitted to any jurisdiction where distribution or dissemination of this whitepaper is prohibited or restricted.

**Views of NFTDevelopments.com:**

The views and opinions expressed in this whitepaper are those of NFTDevelopments.com and do not reflect the official policy or position of any government, quasi-government, authority, or public body (including but not limited to any regulatory body) in any jurisdiction. This whitepaper has not been reviewed by any regulatory authority.

**Graphics:**

All graphics included in this whitepaper are for illustrative purposes only. Graphics with price references do not translate into actual pricing information.

**Risk statements:**

Purchasing NFTD tokens involves substantial risk and may lead to a loss of a substantial or entire amount of the money involved. Prior to purchasing NFTD tokens, you should carefully assess and consider the risks, including those listed in any other documentation.

A purchaser should not purchase NFTD tokens for speculative or investment purposes. Purchasers should only purchase NFTD tokens if they fully understand the nature of the NFTD tokens and accept the risks inherent to the NFTD tokens.

Cryptographic tokens may be subject to expropriation and/or theft, hackers or other malicious groups or organizations may attempt to interfere with our system/network in various ways, including malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing, and spoofing which may result in the loss of your cryptographic tokens or the loss of your ability to access or control your cryptographic tokens. In such event, there may be no remedy, and holders of cryptographic tokens are not guaranteed any remedy, refund, or compensation.

The regulatory status of cryptographic tokens and digital assets is currently unsettled, varies among jurisdictions and subject to significant uncertainty. It is possible that in the future, certain laws, regulations, policies, or rules relating to cryptographic tokens, digital assets, blockchain technology, or blockchain applications may be implemented which may directly or indirectly affect or restrict cryptographic token holders' right to acquire, own, hold, sell, convert, trade, or use cryptographic tokens.

The uncertainty in tax legislation relating to cryptographic tokens and digital assets may expose cryptographic token holders to tax consequences associated with the use or trading of cryptographic token. Digital assets and related products and services carry significant risks. Potential purchasers should consider all the above and assess the nature of, and their own desire for, relevant risks independently and consult their advisers before making any decisions.

**Professional advice:**

You should consult an accountant, tax professional, and/or any other professional advisors as necessary prior to determining whether to purchase NFTD tokens.

**Caution Regarding Forward-Looking Statements:**

This whitepaper contains certain forward-looking statements regarding the business we operate that are based on the belief of NFTDevelopments.com as well as certain assumptions made by and information available to NFTDevelopments.com. Forward-looking statements, by their nature, are subject to significant risks and uncertainties.

Forward-looking statements may involve estimates and assumptions and are subject to risks, uncertainties, and other factors beyond our control and prediction. Accordingly, these factors could cause actual results or outcomes that differ materially from those expressed in the forward-looking statements. Any forward-looking statement speaks only as of the date of which such statement is made, we undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events.

### **Mission and Vision statements:**

NFTDevelopments.com is founded on the principle that it is everyone's right to control our own money, data, assets, and investments. We believe that decentralization holds the key to empowering people around the world to better safeguard their rights, therefore we are helping the world move in this direction by accelerating the transition in adopting cryptocurrency and NFTs to represent and manage mentioned rights.

### **Mission:**

Accelerate the World's Transition to Cryptocurrency and adopt (asset representation based) NFTs.

*We believe that by accelerating the transition to adopting cryptocurrency, asset represented NFTs and investment represented NFTs, we can help people globally to:*

Control and manage their assets - ability to control their assets through NFTs, anytime anywhere.

Control and manage their investments - ability to control their assets through NFTs, anytime anywhere.

Control and manage their money - ability to access their funds anytime and anywhere.

Safeguard their data - cryptography-secured blockchain makes data tempering highly unlikely.

Protect their identity - no central entity can compromise your identity.

### **Vision: Asset and investment representative NFTs:**

### **In our journey to achieve this vision, we are:**

Redefining how NFTS can be realized into the real world, representing assets and investments to name a few. We want to create NFTs representing real world use cases such as assets and investments.

Democratizing blockchain technology by designing beautiful, simple, and useful NFT Services that have a lasting, positive impact on people's lives.

## **PROBLEM STATEMENT AND OUR STRATEGY**

### **Key Challenges in Driving NFT Adoption:**

*We see the following key challenges in driving real world NFT adoption:*

**User Experience:** Poorly designed user experience does not delight or satisfy mainstream users. The experience of the user with the NFT marketplace needs to be seamless as to not deter new users away from a good experience.

**Value Proposition:** Weak value propositions do not incentivize people to use NFTs for purposes other than speculative trading.

**Complexity:** Difficult to understand and invest for new-to-crypto users Security Damaged user confidence from crypto-related fraud and theft. With NFTs often representing a picture or video it is hard for new users to link NFTs with real assets.

### **Definitions of NFTs:**

1<sup>st</sup> Definition: NFT stands for Non-Fungible Token. These tokens can't be changed; everybody is exclusive. For probably the most half, they're a part of the Ethereum blockchain. The token is a certificate of possession. You may get an NFT of your favorite portray (you probably have the cash for it) or a token depicting a soccer participant, meme, or something you may consider, even an emoji. What is the kick? You're the just one who owns it, nobody else can declare it. REF: <https://bit.ly/3adqTLx>

2<sup>nd</sup> Definition: A non-fungible token (NFT) is a unique and non-interchangeable unit of data stored on a digital ledger (blockchain).[1] NFTs can be used to represent easily reproducible items such as photos, videos, audio, and other types of digital files as unique items (analogous to a certificate of authenticity) and use blockchain technology to establish a verified and public proof of ownership. Copies of the original file are not restricted to the owner of the NFT and can be copied and shared like any file. The lack of interchangeability (fungibility) distinguishes NFTs from blockchain cryptocurrencies, such as Bitcoin. REF: [https://en.wikipedia.org/wiki/Non-fungible\\_token](https://en.wikipedia.org/wiki/Non-fungible_token)

### **Our Strategy:**

To tackle the challenges above, we are offering the following products (subject to change):

1. NFT Market place
2. Trading
3. NFTDevelopments currency

Our strategy is to deliver NFT platforms as the primary tool for driving adoption and user acquisition, while building NFT Platforms and financial services solutions as the major sources of revenue. Our secondary source of revenue is realizing token profits into real world assets, with our “NFTDevelopments Ltd” NFTs representing percentages of NFTDevelopments investments, meaning each NFT holder of our NFTs receive multiple streams of revenue. Our tertiary source of revenue is our Native NFTD token which will be the staple of our platform with new platform releases offering incentives to our NFTD token holders, with the NFTD token representing This strategy creates and self-sustains a virtuous cycle: payment channels bring users onto the platform, whereas trading and financial services generate revenue that can be reinvested into payment. Our product solutions across three verticals are building up a sustainable ecosystem that serves our mission: Accelerate the World’s Transition to Cryptocurrency

### **Commitment to Security & Compliance:**

Building trust is the cornerstone of our commitment to our customers - we believe that security and compliance are the foundations of achieving mainstream NFT adoption. Therefore, we will seek all necessary contract audits needed to certify our contracts and install the deserved trust into our platforms.

**NFT Representing NFT Developments investments held.**

**NFT Development NFT marketplace to be released before launch.**

NFTs will be released based on NFT Developments investment portfolio Investments held by NFT Developments. Meaning our NFTs hold real world value. For example, NFT Developments purchases a property worth \$1 million dollars. And you hold one of our NFTs with the metadata representing one of our investments held. Then you will receive quarterly dividends based on that real world assets value. Dividend value will be based on the rarity of the NFT held.

To complement our NFT Platform we will release a native NFTD token, providing our platform with a means of identity and a means to control, reward and stabilise the NFTD brand.

What does all this mean?

With the power of NFT and Crypto Currency. We allow the investment of real-world assets via NFT Contracts. The NFT contract is a direct representation of a real-world asset. NFT Developments NFT Contracts can be bought and sold via our pending NFT Platform, this allows NFT Developments LTD to vet the Contracts traded, ensuring contracts sold are 100% Legit. All Taxes realised are utilised into NFT Developments portfolio for reinvestment, stabilising the NFT Developments platform and committing Liquidity to the NFT Developments poo

If you want to make a lot of money in the crypto markets, it is critical that you understand this distinction. Right now, everyone is obsessed with how blockchain technology will radically change the financial sector and give birth to a new era of decentralized finance – or DeFi, as it is called by insiders. Make no mistake... that will happen. But because everyone is already talking about DeFi, a lot of the biggest money in DeFi tokens has already been made. Sure, these tokens will keep going higher. But the days of 10-bagger gains in a 12-month-stretch are over. That's why, if you're serious about making big money in the crypto markets, you need to focus your attention outside of the DeFi sector – to other areas of the global economy that will be radically transformed by blockchain technology. One of those areas is **non-fungible tokens**, or **NFTs**. In its simplest definition, an NFT is a blockchain-based digital asset that acts, looks, feels, and operates just like a physical asset. The big breakthrough here, of course, is the blockchain aspect. Previously, digital assets were largely worthless because they could be replicated and distributed, without anyone knowing what the "original" digital asset was, thereby rendering the original worthless... But with the blockchain and its signature immutable digital ledger, artists can now create digital assets that can be validated as originals, thereby giving those originals the same value as, say, an original art piece. This authentication lays the groundwork for the NFT market to boom over the next decade. We're not just talking digital art. We're talking digital real estate. Digital toys. Digital trading cards. Digital assets in general.

**We firmly believe that this digital asset market will be as big as or even bigger than the physical asset market in the long run.**

It's a bold claim. Sure. But think about it. We have multiple precedents here.

As soon as digital shopping became just as "good" as physical shopping, everyone started shopping online, and now, the e-commerce industry is on the cusp of becoming bigger than the physical retail market.

As soon as digital entertainment became just as "good" as physical entertainment, everyone started streaming Netflix, Disney+, and HBO Max, and now, the digital entertainment industry is on the cusp of being bigger than the physical entertainment market.

Same with digital advertising. It's better than physical advertising. Within the next few years, digital ad spend will comprise more than 50% of total ad budgets.

Folks... **the precedent has already been set!**

As soon as digital replicas of physical industries become "good," those digital replicas will take over.

### Q1

- Smart Contract Creation
- Website Creation
- Community Build
- Team Build
- Build Social Channels
- Drive people to our Social Channels
- Meet with Legal entities
- New contract creation
- New tokenomics
- Presale with Pinksale
- Pre-Launch Contract audit
- Liquidity Lock
- Funds Vested
- Presale End
- Pancakeswap listing
- pre-sale start
- Beta NFT Market Place Release
- Launch
- Marketing Push
- CMC and CG Listing

### Q2

- Meet with Legal entities regarding legislation of realizing NFTs into real world assets
- Start a Company
- Onboard professional entities to execute NFT Developments plan
- Release a collection of 1000 NFTS

### Q3

- Re design NFT marketplace to suit needs
- Design and build a plat

Pink sale, Whitelisted Presale: 24.5% (2.45 billion) 350 BNB 7 million tokens per BNB.

Commit 70% to liquidity and 30% to marketing wallet:

1,715,000,000 to liquidity 245bnb 122k in liquidity.

735,000,000 tokens refunded.

105 bnb sent to Dev wallet.

Soft cap: 250bnb

Hard cap: 350bnb

Whitelist pre-sale on Pinksale

Start date: On the 30th of November.

Start time: 12pm utc (1am NZT).

Liquidity lock: 6 months

Contribution minimum: 0.1bnb, Maximum contribution: 2bnb

Private Sale: 10% (1 billion) 100 BNB 10 million tokens per bnb 3bnb flat rate

**Total Supply: 10 billion**

**Ticker: \$NFTD**

Normal buy tax: Outside of happy hour.

Buy Tax: 15% (function, public owner only)

Tax Breakup:

Marketing Wallet: 3%

Developer Wallet: 8%

Liquidity: 2%

Reflection: 2%

Normal sell tax: Outside of happy hour.

Sell Tax: 15% (function, public owner only)

Tax Breakup:

Marketing Wallet: 3%

Developer Wallet: 8%

Liquidity: 2%

Reflection: 2%

Maximum Wallet: 1% of Total Supply (100 million) (function, public owner only)

Maximum transaction (buy) normal limit Outside of happy hour: 1% (function, public owner only)

Maximum Transaction (Sell) normal limit Outside of happy hour: 0.25% (function, public owner only)

Sell max transaction limit for the first 30 Minutes of Launch: 0.1% (10 million Tokens)

Sell max transaction limit after 30 Minutes of Launch: 0.5% (50 million Tokens)

Sell max transaction limit after 1 hour of Launch: 1% (100 million Tokens)

Cool down period: 30 seconds in between sells for the first 24hours

Happy Hour: 0% Buy Tax, 30% Sell Tax

Tax Breakup for sell tax during happy hour:

Marketing Wallet: 6%

Developer Wallet: 20%
